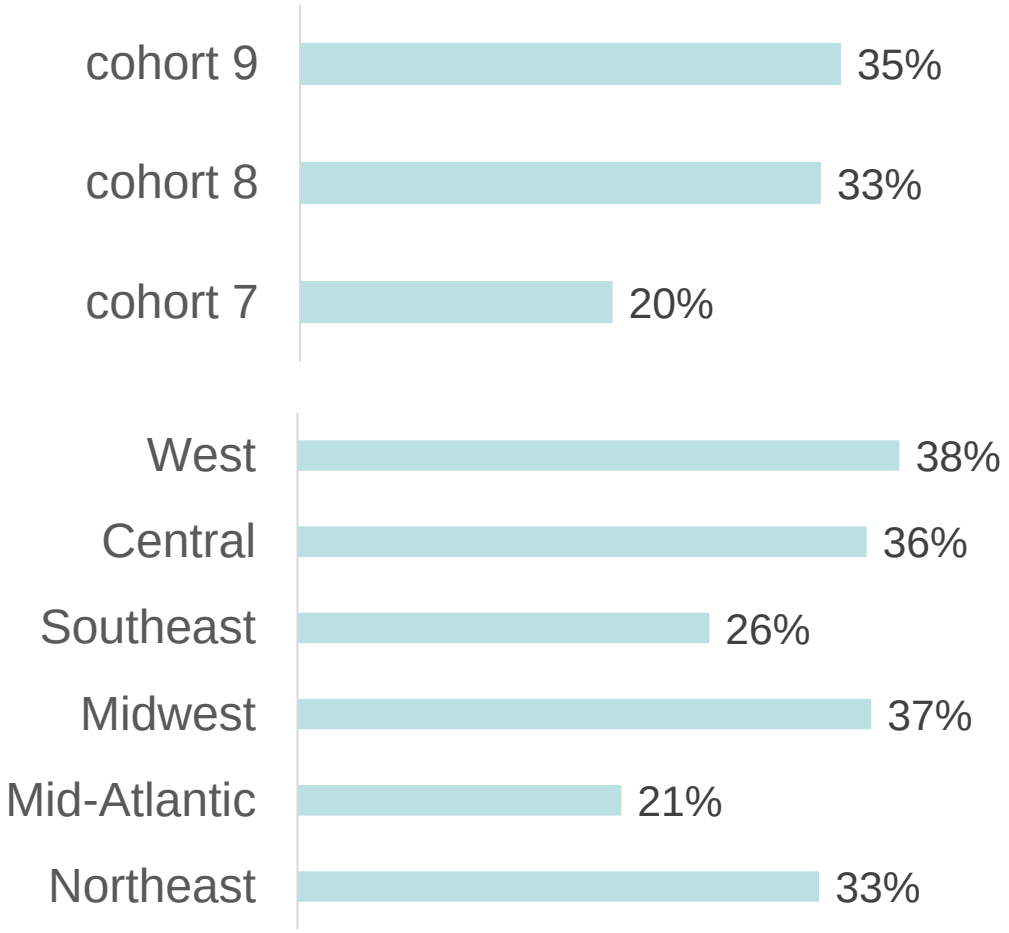
Reassessment and Using Data

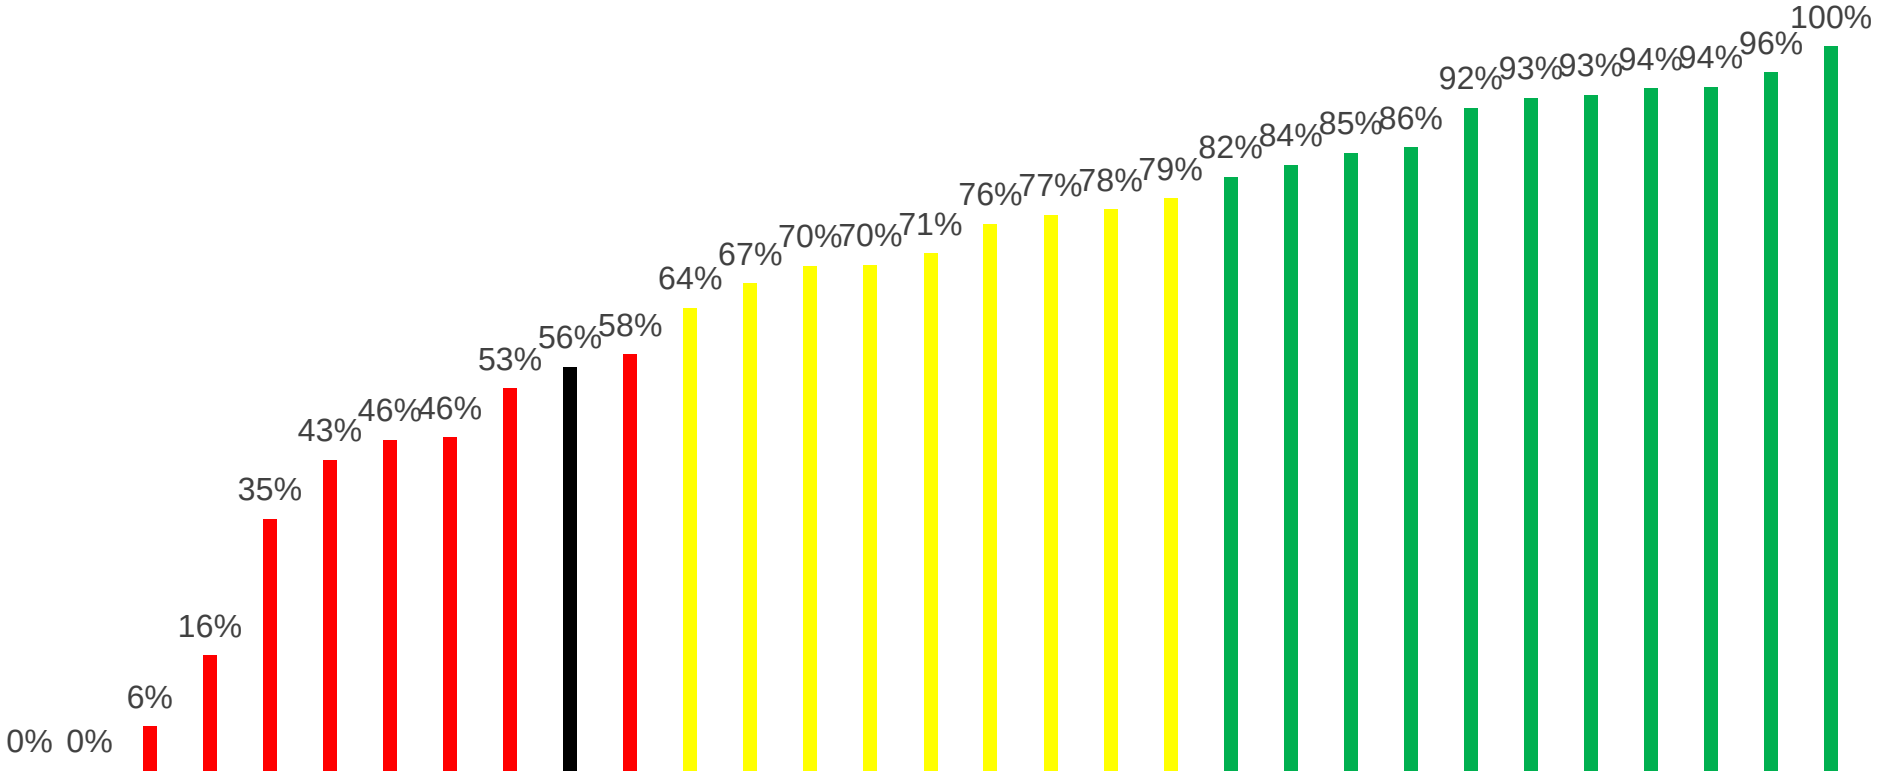
2018 PBHCI Regional Meeting

Percent of grantees in each region/cohort meeting the reassessment target (80%) in FFY18 Q1



34 of 111 grantees (30%) are meeting their reassessment target

Reassessment Rate of Each Midwest Grantee (FFY18 Q1)



Main Reassessment Concepts

1. Identify people who are due to be reassessed
2. Reassess them (both interview and H indicators)
3. Enter data in SPARS

Best Practices – identify people who are due for reassessment

- Use SPARS or your own document. No one correct method as long as your information is accurate
- Start calling them as soon as the reassessment window opens. You have 60 days, don't wait until the last minute!
- Do you schedule the interview or engage with the individual when they're onsite?

Best Practices – getting the interview and H indicators

- Make sure you have enough people trained to do NOMs interviews
- You can offer incentives
- Schedule bloodwork if necessary

Best Practices – entering the data into SPARS

- You have 30 days to enter a complete NOMs interview into SPARS
- Make sure you have a process for adding H indicators to SPARS if the information is not available when the interview is complete

Additional Best Practices

- Check your reassessment rate often
- Check missing H indicator report often
- Draw out a workflow of your reassessment process
  Aids in consistency and tinkering with your process

Group Conversation

What clever or innovative practices have you used to collect information at baseline and reassessment?

Reassessment Resources

- Your fellow grantees
- CIHS Evaluation Toolkit

  https://www.integration.samhsa.gov/pbhci-learning-community/toolkit-evaluation-quality-improvement
- Quarterly Evaluation Affinity Calls
- Emailing Aaron Surma

  AaronS@TheNationalCouncil.org

Panel Conversation

Discussion Questions

How did you collect the data?

- Did you collect anything besides PBHCI?
- Clever collection techniques?

How did you prepare the data?

- Did you use special software? In your EHR? Did you hire someone?

What did you prepare?

- What information are you sharing? Health outcomes? Cost savings?

Who did you share it with?

- The state? Managed care? ACO? Grant applications? Newspaper?

Strengthening & Leveraging Health Outcomes Evaluation Data

Colleen Sproul, Project Director, Saginaw County Community Health Center

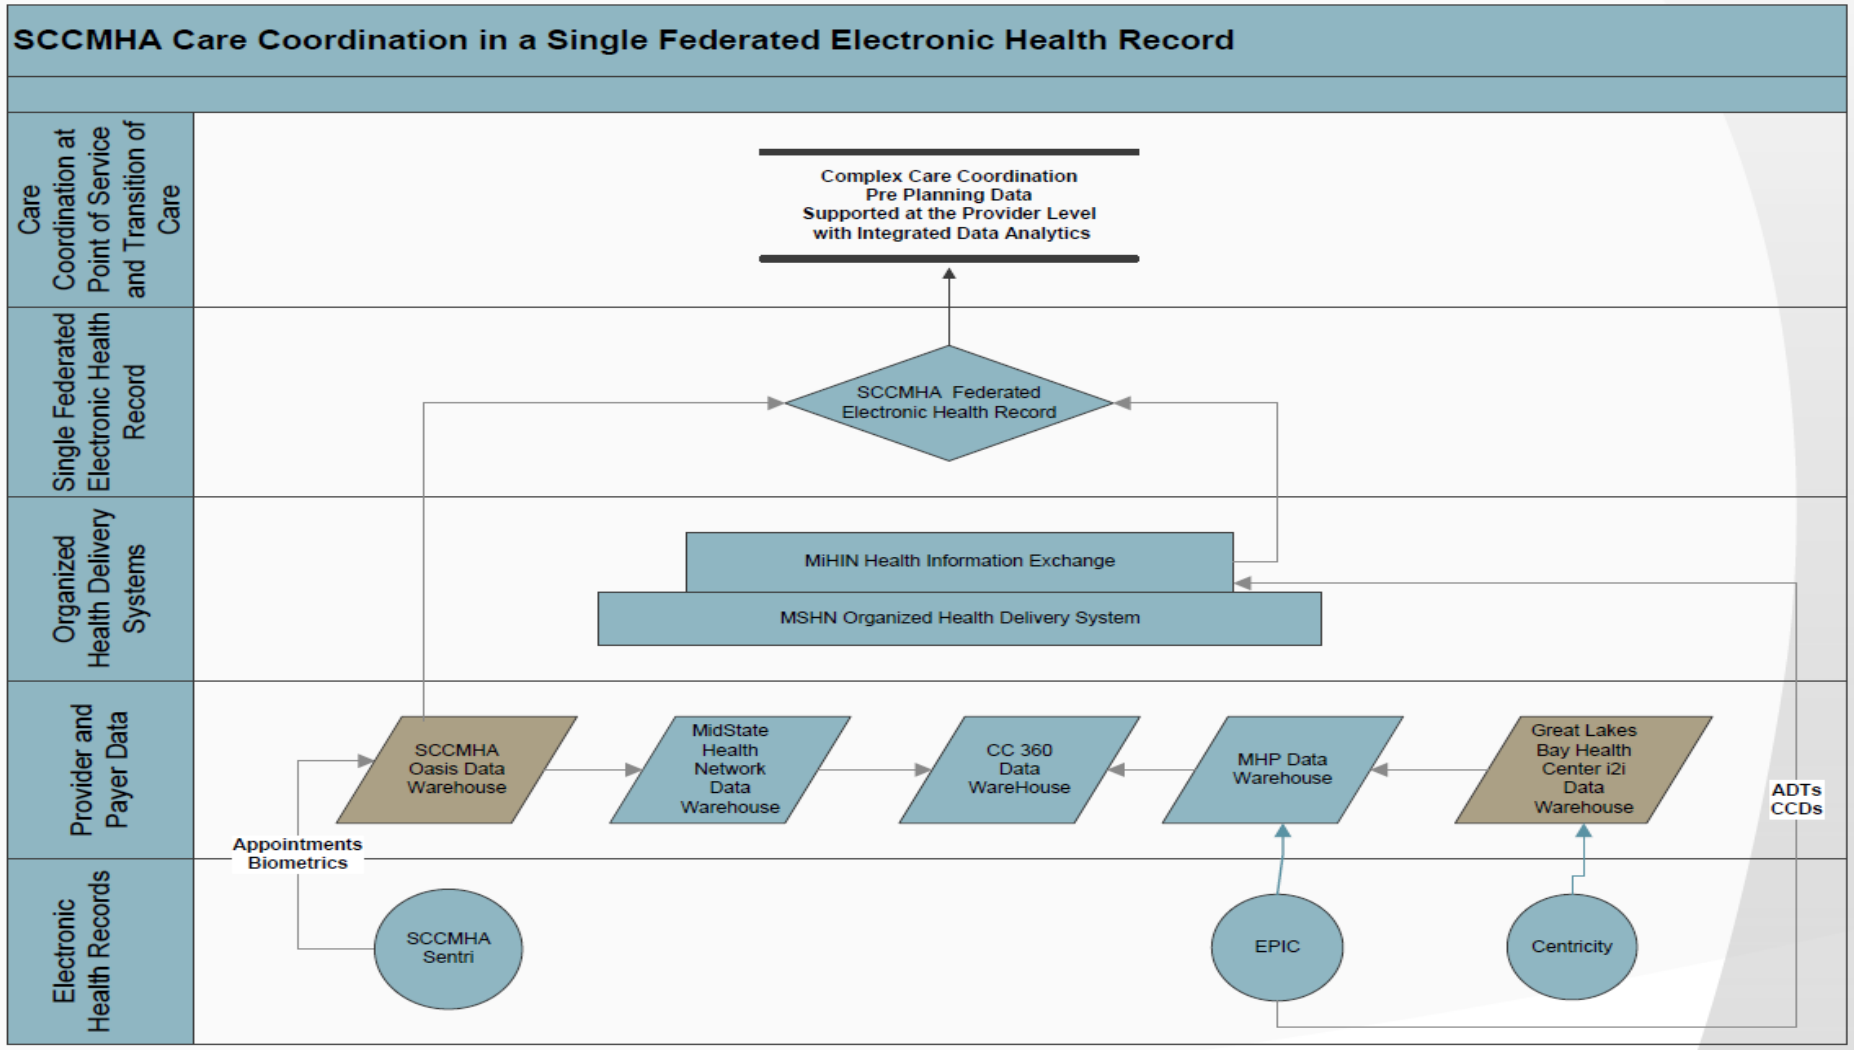
March 22, 2018

Disclaimer

The views, opinions, and content expressed in this presentation do not necessarily reflect the views, opinions, or policies of the Center for Mental Health Services (CMHS), the Substance Abuse and Mental Health Services Administration (SAMHSA), the Health Resources and Services Administration (HRSA), or the U.S. Department of Health and Human Services (HHS).

What is the “why”?

- Mid-State Health Network organizes and empowers a network of publicly-funded community partnerships
- Purchased access to ZENITH/ICDP for the network with the goal to improve population and integrated health activities and coordination of care with MHPs.
  - Complex care management/coordination
  - Integration of SUD with physical and behavioral health with Medicaid health plans
  - Improvement of population health outcomes



Project Value Drivers

1. Efficiency for Front End Users: Data Entry limited to necessary bridging concepts with limited redundancy
2. Synergy: Each system contributes from its strength leveraging a single more capable platform for Complex Care
3. Return on Investment as Evidenced by:
Reduction of Plan All Cause Readmission Rates for County, SCCMHA, Pilot Group

Saginaw County Community Mental Health Authority

EHR Modifications for SAMHSA Upcoming Visits Report

1. Specialized SAMHSA visit types and specific SAMHSA window designations allow our report writers to determine which month window to populate for that visit.

		01/08/2018	02:00:00 pm	SAMHSA-P	CHK	Berlin, Jon	WHCG Nurse/...	24 month	WHCG	Whole Health...
		01/08/2018	11:25:00 am	TEL		Dunst, Elizab...			WHCG	Whole Health...
		01/08/2018	11:21:00 am	TEL		Dunst, Elizab...			WHCG	Whole Health...
		01/02/2018	02:00:00 pm	SAMHSA Sub	CHK	Dunst, Elizab...	Dunst,Elizabeth	24 month SAMHS...	WHCG	Whole Health...

2. We enter the initial NOMS date into structured data in our EHR to use as an anchor date to calculate the future window open and close dates.

Name	Value
NOMs Date	01/18/201

3. We are then able to give the provider a status update which tells them if they need to collect the mechanical indicators, bloodwork, or both by determining if any of these H indicators have already been collected during the specified date range. This allows us to reduce overcollection and cost.

EHR Modifications for SAMHSA Reassessment Tracker Report

1. The NOMS Date is used as an anchor date to generate a list of clients who currently have an open window.
2. If a Reassessment Interview Packet has been completed the NOMS date that corresponds to that specific reassessment window is entered into the structured date. This date pulls onto the report and feeds into the status column.
3. We then use the visit type and reason note to determine if the primary care appointment has been scheduled, completed, or missing.

Questions?

Optional Team Activity (depending on time)

- Make a plan for improving reassessments
- Make a plan for sharing data with external stakeholders
