

SAMHSA-HRSA CENTER for INTEGRATED HEALTH SOLUTIONS

Enhancing Use of Electronic Health Records Roundtable

Colleen O'Donnell, MSW, PMP, CHTS-IM
Public Policy and Programs Specialist
National Council for Behavioral Healthcare

Introduction

- Common Clinical (formerly the “Meaningful Use”) Data Set
- When to share
- What to share
- With or without an EHRS

What is the “Common Clinical Data Set” (formerly “Meaningful Use”) Data

- “Master” patient health data set
- Basis for five reports, including
 - Transition of Care Summary
 - Clinical Summary

What Information Does the Common Clinical Data Set Contain?

“Structured” Data?

- 2015 Edition Certified EHR Standard
 - Everyone Collects Same Data
 - Everyone Uses Same Methods

Patient Demographics

- Patient Name
- Sex (new, not “Gender”)
- Date of Birth
- Race
- Ethnicity
- Preferred Language

Patient “Problems”

- Smoking status
 - Linked to Clinical Quality Measures
- “Problem” (ICD-10 code)
 - Linked to treatment plan, services, billing

Medications

- Active Medications List
- Patient Medication Allergies

Clinical and Biomechanical Indicators

- Lab tests
- Lab results
- Vital signs
- Immunizations

Patient Treatment

- Assessment and Plan of Treatment (new)
- Goals
- Health Concerns

Transition of Care Summary

- Can be .pdf file
- Follows patient (referral loop)
- Patient demographics
- Medications information
- Problems
- Indicators (test results)

Clinical Summary

- Can be .pdf file
- Shared with patient, each encounter
- Shared with care team members
- Everything that happened in encounter
- Patient Instructions

Sharing Patient Health Information

- Receive and transmit via Direct
- Directly from patient record
- Transition of Care Summary
- Clinical Summary

Summary

- Common Clinical Data Set – Master set
- When to share – referrals and encounters
- What to share – Transition of Care, Clinical Summary
- How to Share - Direct messaging, does not require EHRS
