## Team Introductions

### Team Lead:

- Introduce yourself and your team members by name and roles
- Share one thing you are most proud of related to your PBHCI OR
- One thing you know now that you wish you knew at the start OR
- A particular challenge you faced and how you overcame it

## Review of Agenda

Day 1) The Future of Integration

Day 2) BHICA, CQI and Benchmarking  
Behavior Change

**SAMHSA-HRSA**  
**Center for Integrated Health Solutions**

## Goals for Our Time Together!

Take this opportunity to leave behind your clinical & administrative duties for a few days to learn from each other & reflect on how best to leverage this knowledge for your PBHCI programming!

**SAMHSA-HRSA**  
**Center for Integrated Health Solutions**

## Goals for Our Time Together!

**Today** we will focus the wider healthcare landscape you are all traversing, which covers national, state, and local terrain. Understanding the map is never the same as walking the territory so we will discuss what you are seeing as you execute your PBHCI grant and review some techniques for how to frame your thinking as you move forward

**Tomorrow** we will build on our discussion from today and dive into a specific plan that you can leave with to effect a positive change in your PBHCI program

## Plan for Today!

Part 1: Small Group discussion, identification and listing of the groups' best understanding of where the health field is going:

- What is happening at the federal, state and local levels that will likely impact your integrated care efforts now and in the future?
- Think about - what can an organization do now to be best prepared for the future of healthcare?

Part 2: Large Group discussion on how to meet the challenges of a changing system of care

Part 3: Team discussion and development of plan

## The Changing Healthcare Landscape

- Movement toward performance-based contracts & bundled costs/rates
- Focus on linking Evidence-based Clinical Care-Pathways to Clinical Workflows in order to achieve "Treat to Target" clinical outcomes and cost containment
- Increased presence of Managed Care Organizations in the Medicaid Marketplace
- Health Information Technology is driving clinical decision support, information sharing, & supporting consumer behavior change (e.g., health apps)

## Given What We've Discussed, Now What?

In preparation for our work tomorrow use the work we've done so far today to discuss the implications this does or does not have for informing your Behavioral Health Integration Capacity Assessment (BHICA) findings

Discuss which BHICA findings you plan to target for developing a PBHCI improvement plan
